Timothy Wilburn

Lexington, KY 40517 timwilburndev.com (513)886-1440 timwilburn8@gmail.com

Full Stack Developer and UI/UX Specialist focused on building practical, scalable web applications. With a background in both design and development, I care just as much about clean code as I do about a great user interface. My recent work ranges from managing massive data migrations—handling over a million records and $23M in inventory—to developing secure, compliant features for core banking systems. Whether I'm building custom React component libraries or complex GraphQL APIs, my goal is always to deliver solid, user-centric solutions.

WORK HISTORY

Software Developer

Cabem Technologies | Remote
May 2026 to November 2026

- Developed, optimized, and debugged software actively processing high-value market deals and wire transfers, ensuring strict adherence to industry and government compliance requirements.
- Engineered new features, investigated complex bugs, and authored unit/integration tests for core banking models in a rigorous Agile environment utilizing Jira and senior developer peer reviews.
- Authored comprehensive technical design notes, test plans, and security impact evaluations to ensure robust quality assurance and compliance across feature rollouts.
- Managed complex merge requests and release workflows across multi-versioned legacy codebases and git submodules while coordinating seamlessly with cross-functional teams.

Web & Mobile Developer

eLink Design | Lexington, KY
December 2023 to January 2026

- Planned, developed, and maintained data-intensive web applications and mobile apps for public and enterprise use. Specifically focused in React, React Native, PHP, and SQL.
- Planned and wrote data migrations for clients who were updating their tech stack or expanding their business, handling 130k and 1M of inventory records estimated at $23M+ and $5M respectively.
- Wrote and maintained unit tests using Laravel's built-in testing suite and Jest.

Independent Developer

Lexington, KY
September 2022 to December 2023

- Continued Development education.
- Worked on personal projects and researched new technologies.

Timothy Wilburn *Lexington, KY* *5138861440* *timwilburn8@gmail.com*

Platform Developer

THESIS Education | Lexington, KY
January 2022 to September 2022

- Maintained and developed features for a monolithic codebase of Business Education, Band classroom collaboration, and K-5 Music Education applications to further develop and grow the core business.
- Added API and front-end React features using GraphQL and Apollo, expanding on the proprietary libraries and packages used across all applications.
- Wrote and maintained unit tests using Test Driven Development for NodeJS API services and PostgreSQL database queries.

Web Developer and Designer

Systems Insight | Covington, KY
August 2018 to December 2021

- Built fully scalable enterprise React applications for various business sectors that improved internal communications, expanded market footprint, and increased revenue.
- Worked one-on-one with clients and team leads to plan, wireframe, design, and prototype complex UI to iterate designs quickly.
- Constructed and maintained large-scale WordPress websites in the education sector and local government municipality, leading to a more efficient web presence, increased traffic rates, and provided new functionality to the public.
- Improved app and site UX/UI by analyzing site traffic and defining and developing new designs and features.

SKILLS

- HTML, CSS, JavaScript, TypeScript, React, React Native, Node.js, WordPress, SQL, PostgreSQL, GraphQL, Apollo, Redux, Redux-Saga, Jest, Objection.js, MongoDB, Firebase.
- AWS authentication and storage, Google Cloud Services and APIs.
- Experience with Object-Oriented and Functional Programming software design paradigms for front-end and back-end JavaScript and PHP development.
- Object-oriented CSS, BEM CSS naming, and structural methodologies.
- Entry-level understanding of data structures and sorting/searching algorithms.
- Created large-scale design systems, presentations, wireframes, visual theming, and UI design for web and mobile applications.
- Git, GitHub, GitHub Projects, Bitbucket, Jira, Confluence, Notion, Trello.
- Webpack, Gulp.js, AWS: Cognito, and Amplify (front-end development).
- Google Analytics v3 and v4, Adobe XD, Adobe Illustrator, Figma.
